

MUT-312 dk-76 mt-

Cat. No. ALS-01312

Lot. No. (See product label)

Subcategory

Mutants

Description

Nitrosoguanidine-induced in wild type mt-. This is the original mutant. This strain has reduced levels of cyanide-sensitive respiration and and cytochrome oxidase, but essentially normal mitochondrial ultrastructure. At last check, the strain still showed a dark-dier phenotype, with very slow growth at most in the dark.

Species

Chlamydomonas

Phenotype

Dies in the dark
