

MUT-317 dk-110 mt+

Cat. No. ALS-01317

Lot. No. (See product label)

Subcategory

Mutants

Description

Nitrosoguanidine-induced in wild type mt+. This is the original mutant. This strain has reduced levels of cyanide-sensitive respiration and cytochrome oxidase, but essentially normal mitochondrial ultrastructure. At last check, the strain showed a leaky dark-dier phenotype.

Species

Chlamydomonas

Phenotype

Dies in the dark
