

MUT-551 ac177 mt+

Cat. No. ALS-01411

Lot. No. (See product label)

Subcategory

Mutants

Description

The ac177 mutation was UV-induced. This mutant was listed as nonphotosynthetic; the specific defect has not been determined. This locus is erroneously labeled ac17 rather than ac177 on the linkage group XIV map. This strain was easy to score at its most recent check, a good marker for this linkage group.

Species

Chlamydomonas

Locus

AC177

Chromosome

13

Phenotype

Requires acetate
