

MUT-828 If1-1

Cat. No. ALS-01484

Lot. No. (See product label)

Subcategory

Mutants

Description

This mutant was obtained in the 137c background, using nitrosoguanidine as mutagen, and was originally named NG5. It has long flagella, and is now known as If1-1. MUT-802 is the same mutant, and is the one that we normally distribute since it has been more thoroughly characterized.

Species

Chlamydomonas

Locus

LF1

Chromosome

2

Phenotype

Impaired motility
