

MUT-1330 ac12 act1 nic2 mt+

Cat. No. ALS-01756

Lot. No. (See product label)

Subcategory

Mutants

Description

From a series of crosses in 1982. The ac12 allele traces back to MUT-1020, act1 to MUT-270, and nic2 to MUT-11. This strain marks linkage group II with three easily scored mutations.

Species

Chlamydomonas

Locus

AC12, ACT1, NIC2 [QPT1]

Chromosome

2

Phenotype

Requires acetate and nicotinamide; antibiotic resistant (cycloheximide)
