

MUT-1356 lut1

Cat. No. ALS-01763

Lot. No. (See product label)

Subcategory

Mutants

Description

This strain is light green and is sensitive to bright light. We maintain it in the dark. This mutant was isolated as a segregant from a cross to wild type of a yellow-in-the-light revertant from the lts1-154 strain. This strain was shown to be photosensitive in bright light. It was described as "lutescent", being yellow-green in the dark and yellow in the light.

Species

Chlamydomonas

Phenotype

Chlorophyll deficient
