

# MUT-1386 pf26 mt+

*Cat. No.* ALS-01779

*Lot. No.* (See product label)

---

## Subcategory

Mutants

## Description

This is currently the only pf26 strain in the collection. This locus is very closely linked to PF1, but the original pf26 mutant complements with pf1 in a stable diploid strain. The PF26 locus has been shown to correspond to the gene encoding radial spoke protein 6.

## Species

Chlamydomonas

## Locus

PF26 [RSP6]

## Chromosome

5

## Phenotype

Impaired motility
