

MUT-2113 uvs10 mt+

Cat. No. ALS-02183

Lot. No. (See product label)

Subcategory

Mutants

Description

This UV-sensitive mutant is not deficient in excision repair, but may have a defect in recombinational repair. The UVS10 locus was mapped to the right arm of linkage group I, about 31 map units from the centromere, but has not been placed relative to other markers in this region. See MUT-2387 for the same mutation in mt-.

Species

Chlamydomonas

Locus

UVS10

Chromosome

1

Phenotype

UV sensitive
