

MUT-3098 VHLR-S3 mt+

Cat. No. ALS-02743

Lot. No. (See product label)

Subcategory

Mutants

Description

This strain, which grows well at very high light intensities, was originally described as "125 S-3 high light suppressor". This is a spontaneous mutant selected in the wild-type strain MUT-125 for ability to grow and remain green at very high light intensity (1500-2000 micromole photons per square meter per second).

Species

Chlamydomonas

Phenotype

Can grow at very high light intensity
