

MUT-3426 ccs1-4 mt+

Cat. No. ALS-02804

Lot. No. (See product label)

Subcategory

Mutants

Description

The ccs1 mutants are alleles at a locus originally defined by the ac206 mutation (see MUT-939 for more information on that mutant). The protein encoded by this locus is required for synthesis of cytochrome c.

Species

Chlamydomonas

Locus

CCS1

Chromosome

13

Phenotype

Requires acetate
