

MUT-3672 B4(1) mt-?

Cat. No. ALS-02984

Lot. No. (See product label)

Subcategory

Mutants

Description

B4 is a mutant deficient in Photosystem I, isolated by treatment with 5-fluorodeoxyuridine followed by metronidazole selection as described. It was characterized as a nuclear mutation that affects splicing of the chloroplast-encoded *psaA* gene.

Species

Chlamydomonas

Phenotype

Requires acetate
