

MUT-4724 rbcS1-I58K mt-

Cat. No. ALS-03861

Lot. No. (See product label)

Subcategory

Mutants

Description

Using plasmid pSS1, which contains rbcS1 that encodes Rubisco small-subunit 1, and rbcSΔ-T60-3 mt- (MUT-4690) as the host strain, directed mutagenesis and nuclear-gene transformation were used to create an I58K substitution (ATC-AAG) in the Rubisco small subunit. This strain has been maintained with acetate medium in darkness since its isolation.

Species

Chlamydomonas

Locus

RBCS1

Chromosome

2
