

MUT-5519 dhc1b (temperature sensitive)

Cat. No. ALS-04519

Lot. No. (See product label)

Subcategory

Mutants

Description

Permissive temperature: 18C - flagella are variable but have average length of one half of wild type. Non-permissive temperature: 32 °C - flagella shorten rapidly, average less than half of original length. Alternate name is dhc1b-2, so as to distinguish it from dhc1b-3. dhc1b-ts and dhc1b-2 are aliases.

Species

Chlamydomonas
