

Myc epitope tag

Cat. No. APA-AT-076

Lot. No. (See product label)

Product Name

Myc epitope tag

Host

Mouse

Immunogen

Myc epitope tag, sequence: EQKLISEEDL

Sub class

IgG1a

Background

The anti-Myc tag is a primary antibody which is used to detect proteins containing the Myc epitope tag. The Myc tag contains the amino acid sequence EQKLISEEDL, corresponding to amino acids 410-419 of human Myc.

Format

Liquid

Clonality

Monoclonal

Purity

Affinity purified in PBS pH 7.4. Contains 0.02 % sodium azide. Contains 50 % glycerol.

Quantity

50 µg

Reactivity

Myc-tagged proteins

Confirmed reactivity

Myc epitope tag

Expected/apparent MW

Depends upon protein fusion partner

Tested applications

ELISA (ELISA), Western blot (WB)

Recommended dilution

1: 500 - 1: 5000 (WB)

Storage

Store at -20°C, Make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
