MSM

Cat. No. *ENR-M-016*

Lot. No. (See product label)

Product Name
MSM

Size
1 kg, 25 kg, Custom size

Synonyms
Dimethyl sulfone

Molecular weight
94.13

Molecular formula
$C_2H_6O_2S$

CAS number
67-71-0

Detection method
HPLC

Appearance
White powder

Product introduction
Dimethyl sulfone (MSM) is an organic sulfide, which can enhance the ability of the human body to produce insulin and promote the metabolism of carbohydrates. It is a necessary substance for the synthesis of collagen in the human body. It can promote wound healing, and can also play a role in the synthesis and activation of vitamin B, vitamin C, and biotin required for metabolism and nerve health. It is called natural beautifying carbon material.

Production process
Synthesis

Storage temperature
Cool and dry, keep away from light and seal.

Application areas
It is used as organic synthesis raw material, high temperature solvent, food additive and health care product raw material, etc.

Customization
1. OEM service (capsules, tablets, gummies)
2. Recipe recommendation
3. Private label

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
