

Rose Oil

Cat. No. NOP-001

Lot. No. (See product label)

Product Name

Rose Oil

Botanical Source

Rose rugosa sweet

Appearance

Clear, yellow to brown oily liquid.

Plant Part Used

Fresh flower

Description

Rose oil is mainly extracted from the petals of plants in the Rosaceae family by distillation or solvent extraction. Its chemical composition is complex, mainly including monoterpenes, citronellol, geraniol, nerol, aromatic compounds, phenylethanol, eugenol and so on.

Application

Rose essential oil has an elegant aroma and diverse benefits. It is widely used in high-end skincare, medical and perfumery applications.

Function

Helps depression and anxiety. Rose oil has calming and uplifting properties that can help to reduce symptoms of depression and anxiety.

Fights acne. Rose oil has antibacterial and anti-inflammatory properties that can help fight acne.

Anti-aging. Rose oil is rich in antioxidants that can help to protect the skin from damage caused by free radicals.

Boosts libido. Rose oil is a natural aphrodisiac that can help boost libido and improve sexual function.

Improves dysmenorrhea. Rose oil has antispasmodic and analgesic properties that can help to relieve pain and cramps associated with dysmenorrhea.

Incredible natural perfume. Rose oil has a sweet, floral scent that makes it a popular choice for perfumes and other fragrance products.
