

# Cosmetic Grade Xanthan Gum

Cat. No. CIP-013

Lot. No. (See product label)

---

## Product Name

Cosmetic Grade Xanthan Gum

## Product Description

Cosmetic-grade xanthan gum is a natural polysaccharide produced through microbial fermentation. It serves as a multifunctional ingredient in skincare, haircare, and makeup formulations, offering excellent thickening, stabilizing, suspending, and moisturizing properties.

## Key Features

With high purity, safety, and skin compatibility, it enhances product texture and stability while maintaining a smooth, non-greasy feel. Xanthan gum helps prevent phase separation, improves spreadability, and supports clean beauty and vegan formulations.

## Applications

Natural, safe, and biodegradable.

Excellent viscosity control and stability across pH 3–11.

Enhances texture and sensory feel.

Compatible with a wide range of ingredients.

Ideal for creams, gels, cleansers, and makeup products.
