

Gellan Gum for Personal Care Products

Cat. No. FGP-012

Lot. No. (See product label)

Product Name

Gellan Gum for Personal Care Products

Product Description

In personal care products such as sunscreens, lotions, and gentle conditioners, carrageenan primarily functions as a structural stabilizer rather than a gelling agent. It imparts texture, stability, and a comfortable skin feel to the product.

Features

This product is highly compatible with other colloids and mineral salts, enabling the formulation of products with varying textures and functionalities.

Application

In cosmetic applications, gellan gum is often used as a structuring agent and gelling agent, imparting richness, stability, and a comfortable feel to products. It is used in shampoos, conditioners, sunscreens, and toothpastes.
