

Blue Cornmeal Powder

Cat. No. *FIP-002*

Lot. No. (See product label)

Product Name

Blue Cornmeal Powder

Parts Used

Corn

Form

Powder

Color Appearance

Blue color powder.

Product Applications

Nutritional supplements, cosmetics, herbal teas, capsules, tablets, functional foods and beverages.

Product Offerings

Blue cornmeal powder.

Product Description

Blue cornmeal is a type of cornmeal made from blue corn, a variety of maize with deep blue or purple kernels. Known for its slightly sweeter and nuttier flavor compared to yellow or white cornmeal, blue cornmeal is a traditional ingredient in native american cuisine. It is rich in antioxidants, including anthocyanins, which give it its vibrant color, and provides higher protein and fiber content than yellow cornmeal.
