

# Buffalo Milk Powder

Cat. No. FIP-003

Lot. No. (See product label)

## Product Name

Buffalo Milk Powder

## Form

Powder

## Color Appearance

White color powder.

## Product Applications

Nutritional supplements, cosmetics, herbal teas, capsules, tablets, functional foods and beverages.

## Product Offerings

Buffalo milk powder.

## Product Description

Buffalo milk powder is a dairy product obtained by evaporating buffalo milk to eliminate its water content, resulting in a fine powdered form. It is an alternative to liquid buffalo milk that offers convenience and a longer shelf life. Buffalo milk powder retains the natural richness of buffalo milk, containing higher fat content and essential nutrients like protein, calcium, vitamins, and minerals. It finds application in a variety of culinary uses, such as baking, cooking, and the production of dairy-based beverages.
