

Carob Powder

Cat. No. *FIP-014*

Lot. No. (See product label)

Product Name

Carob Powder

Parts Used

Seeds or pods

Form

Powder

Color Appearance

Light brown colored powder.

Product Applications

Baking, beverages and smoothies.

Product Offerings

Carob powder.

Product Description

Carob powder is a natural, caffeine-free alternative to cocoa, derived from the dried and roasted pods of the carob tree. With a mildly sweet, earthy flavor and a hint of caramel, it is commonly used in baking, smoothies, and beverages. Light roasting enhances its natural sweetness while maintaining its nutritional value, including fiber, antioxidants, and essential minerals like calcium and potassium. Unlike cocoa, carob is free from theobromine, making it a suitable choice for individuals sensitive to stimulants. Its versatility and health benefits make it a popular ingredient in health-conscious and vegan-friendly diets.
