

# Oat Flour

Cat. No. FIP-016

Lot. No. (See product label)

---

## Product Name

Oat Flour

## Parts Used

Oats

## Form

Flour

## Color Appearance

Brown color powder.

## Product Applications

Nutritional supplements, cosmetics, herbal teas, capsules, tablets, functional foods and beverages.

## Product Offerings

Oat flour.

## Product Description

Oat flour is a gluten-free alternative to traditional wheat flour, made by grinding whole oats into a fine powder. Rich in fiber, vitamins, and minerals, it offers numerous health benefits, including improved digestion, reduced cholesterol levels, and stabilized blood sugar. Oat flour adds a nutty flavor and moist texture to baked goods, making it popular in pancakes, cookies, and bread. Its versatility extends to savory dishes like coatings for meats and thickening agents for sauces.
