

Dexamethasone Colloidal Gold Rapid Test Strip

Cat. No. ART-014

Lot. No. (See product label)

Product Name

Dexamethasone Colloidal Gold Rapid Test Strip

Product Introduction

The Dexamethasone Colloidal Gold Rapid Test Strip is designed for the rapid detection of dexamethasone residues in aquatic product tissues and livestock and poultry meat. The entire testing process takes approximately 15 minutes, with a sensitivity of 100 µg/kg (ppb). It is suitable for use by various enterprises and testing institutions.

Applicable Samples

Tissue

Precautions

1. Please follow the operating procedures. Do not touch the test strip's display area during use.
2. If you discover expired, damaged, contaminated, or defective products upon purchase, please return them to the place of purchase for replacement.
3. This product is for single-use only. Use the test strip immediately after opening; do not reuse it.
4. Do not add samples to the sample well immediately after removing them from the refrigerator or after processing. Allow the sample to return to room temperature ($20\pm5^{\circ}\text{C}$) before testing.
5. Do not use water or other liquids as negative control samples.

Shelf Life

Shelf life is 12 months. The production date, expiration date, and lot number are indicated on the outer packaging.

Storage

Store the original packaging at $2-30^{\circ}\text{C}$ in a cool, dry place away from light. Do not freeze or expose to direct sunlight.
