

PolyDADMAC

Cat. No. PCA-006

Lot. No. (See product label)

Product Name

PolyDADMAC

Appearance

Light yellow and transparent viscous liquid.

Content

40%±1.0%,
50%±1.0%,
60%±1.0%.

PH Value

4.0–7.0

Ionicity

Cationic

Product Introduction

PolyDADMAC is a cationic linear polymer that can be completely dissolved in water. Polymers contain strong cationic groups and active adsorption groups. The suspended particles and water-soluble substances containing negative charges in water can be destabilized and flocculated by neutralization and bridging. In the paper industry, it is often used to improve the hanging rate of pulp and promote the ripening of pulp.

Product Applications

Paper industry

Shelf Life

18 months (4°C–30°C)

Packaging

200 kg or 1000 kg plastic drums.

Storage

Prevent sunshine and rain. Keep away from fire and heat sources.
