

Okra extract

Cat. No. EXT-025

Lot. No. (See product label)

Product Name

Okra extract

Product Overview

The product belongs to plant extract.

Source

Okra extracts include young pod extract and whole grass extract. It is advisable to use fresh okra tender pod as raw material for extract of tender pod. Dry tender pod fruit can also be considered when conditions do not permit. It is advisable to use the fresh stem and leaf of whole grass extract, or the whole dried grass extract if the condition is not allowed. In terms of retention of nutrients, fresh is far better than dried.

Form

Brown and yellow powder

Synonyms

Okra extract

Function

Okra extract has health care effect on the skin, and can whiten and tender the skin. Fiber also makes it easy to remove waste from your body, making it a great nutrient. The abundant plant flavones in extract, combined with various nutritional elements, can promote the all-round self-conditioning of human body, so as to ensure endocrine balance, anti-aging, anti-fatigue, endurance, blood circulation and other effects. At the same time, the mucilage of okra extract can well help gastrointestinal peristalsis, secretion of mucin has the role of protecting the stomach wall, and promote gastric juice secretion, improve appetite, improve indigestion, reduce cholesterol, prevent cardiovascular diseases, chronic stomach diseases and "three high" people eat.
