

Algae Culture for Tetraselmis

Cat. No. AC-005

Lot. No. (See product label)

Product Name

Algae Culture for Tetraselmis

Size

1 mL, 50 mL, 500 mL, 1 L and 20 L available

Product Overview

This product can be used to resupply your stash or continue the experimentation you began with our many kits and experiments.

Description

Tetraselmis has been used for research into photosynthesis and cell division. More recently it has been grown for biofuels consideration.

Division

Chlorophyta

Type

Seawater

Applications

Aquarium feed, aquaculture, study photosynthesis, research, science fair projects.

Recommended Use With

- Seawater Nutrient Media

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
