

Greenhouse Manual Rolling Shutter

Cat. No. FAD-012

Lot. No. (See product label)

Product Name

Greenhouse Manual Rolling Shutter

Product Overview

Rolling machine is an agricultural equipment used for greenhouse grass curtain and insulation automatically rolled and put. The role of using the roll-up machine is to shorten the roll-up time of the insulation, which can generally increase the sunshine time by nearly 2 hours per day and raise the temperature in the greenhouse by 3-5°C.

Source

Greenhouse Rolling Shutter

Usage

Rolling and placing the insulation curtain of greenhouse.

Motivation Source

Manual

Usable Greenhouse Length

1-100 m
