

Conductivity Meter

Cat. No. FAD-042

Lot. No. (See product label)

Product Name

Conductivity Meter

Product Overview

Conductivity meter is mainly used for the detection of water conductivity. Conductivity is an important indicator of water quality, which indicates the concentration of electrolytes present in water, and the size of its value is related to the amount of inorganic acids, bases and salts.

Source

Aquaculture Equipment

Usage

Water quality testing.

Power

< 5 W

Feature

Automatic remote control, accurate and fast real-time detection

Type of Power Supply

220 V AC / 24 V DC

Applicable Space

Aquaculture ponds

Detection Range

0 - 600 Sm/cm

Operating Temperature

0 - 60 °C

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
