

CO₂ Monitoring Station

Cat. No. FAD-056

Lot. No. (See product label)

Product Name

CO₂ Monitoring Station

Product Overview

CO₂ monitoring stations are widely used in the planting industry. CO₂ is an important material basis for photosynthesis in plants and is an important indicator for determining agricultural income growth.

Source

Facility Horticulture

Usage

Automatic CO₂ detection.

Feature

All-day monitoring, remote monitoring, solar-powered, intelligent optimization of CO₂ concentration

Type of Power Supply

Solar energy or DC

Applicable Space

Greenhouses, farmland

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
