

Fruit & Stem Growth Sensor

Cat. No. FAD-062

Lot. No. (See product label)

Product Name

Fruit & Stem Growth Sensor

Product Overview

The fruit and stem sensor measurement principle uses the distance the displacement sensor moves to measure the growth length, and can be connected to a transmission device to view the growth data remotely and in real time.

Source

Facility Horticulture

Usage

Monitoring crop growth data.

Feature

Real-time monitoring with intelligent optimization suggestions

Type of Power Supply

Solar energy or DC

Applicable Space

Greenhouses, farmland

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
