

Animal Physiological Characteristics Detector

Cat. No. FAD-065

Lot. No. (See product label)

Product Name

Animal Physiological Characteristics Detector

Product Overview

Animal physiological characteristics detector can be used to remotely monitor animal movement, temperature and weight, which is convenient for physiological state analysis and disease management at any time.

Source

Livestock Farming

Usage

Animal physiological status monitoring and disease prediction.

Feature

Solar-powered, waterproof, drought-resistant, real-time monitoring, remote control

Type of Power Supply

Solar energy

Applicable Space

Livestock farm

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
