

Spirulina Liquid Extract

Cat. No. SE-013

Lot. No. (See product label)

Product Name

Spirulina Liquid Extract

Product Overview

Spirulina Liquid Extract is an upgraded version of powdered phycocyanin, while it's more convenient to use. The natural blue food dye is a blue honey-like liquid with features of fast-dissolving, no dust flying, and easy to use.

Description

Blue spirulina (phycocyanin) is a kind of protein binding pigment, with the same properties as protein. Its final product is blue liquid, easy soluble in water and insoluble in ethyl alcohol and grease. It has poor stability to heat, light and acid, while it is stable under weak acid and neutral conditions (PH4.5-8). However, will occur precipitation phenomenon under acid conditions, and strong alkali can make phycocyanin discoloured, it has poor stability to metal ions and poor chromaticity.

Applications

Spirulina liquid extract is perfect for coloring foods and solid beverages, such as blue smoothies, ice cream, baking, noodles, etc.
