

Organic Hydrolyzed Pea Protein

Cat. No. OPP-18

Lot. No. (See product label)

Product Name

Organic Hydrolyzed Pea Protein

Package

1-5 kg/Aluminum foil bag, size: 22cm (Width)*32cm (Length)

15-2 5kg/Drum, size: 38cm (Diameter)*50cm (Height) (in general, needed re-confirm)

Product overview

Organic Hydrolyzed Pea Protein (also called instant pea protein), is a water-soluble pea protein.

Description

It is produced from the pea protein under a series of processes like protease digestion, membrane separation, bitterness removal, and small molecule protein hydrolysate. It is based on one of the best, highly pure raw materials produced from a locally grown yellow pea. This process is absolutely natural and does not contain any GMOs. It takes place based on a unique water process without using organic solvents or hexane. It is well-digested, suitable for different diets, and does not contain allergenic components. Importantly, this kind of pea protein contributes to the growth and maintenance of muscle mass, as well as to preserve healthy bones, and it is one of the most easily absorbed plant proteins!

Specification

80% protein, pale yellow or milky white powder

Certificate

NOP & EU Organic, BRC, ISO22000, Kosher, Halal, HACCP

Application

Basic nutritional ingredients, Protein beverage, Sports Nutrition, Energy bar, Protein enhanced snack or cookie, Nutritional Smoothie, Baby & pregnant nutrition, Vegan food

Features

Also called instant pea protein or water-soluble pea protein, it is produced from the pea protein under a special process of protease digestion-membrane separation-bitterness removing-small molecule protein hydrolysate. Plant-based protein, Completely Amino Acid, Muscle growth, Pesticides free, low fat, low calories, Basic nutrients, Vegan, Easy digestion & absorption.

Shelf life

2 years

Storage

Kept away from wet, strong light and heat

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
