Product Name

Organic Chickpea Protein

Package

25 kg/drum

Product overview

Organic chickpea protein, also known as chickpeas, chickpeas, and peaches, are legumes native to Europe. They are cultivated on a large scale in Shandong, Taiwan, Inner Mongolia, and other places because of their fragrant taste and high nutritional value.

Description

Organic chickpea protein contains adenine, choline, inositol, starch, sucrose, glucose, and so on. Among them, the pure protein content is as high as 28%, fat 5%, carbohydrate 61%, fiber 4-6%, chickpeas contain more than 10 kinds of amino acids, of which all the 8 essential amino acids for the human body are available, and the content is higher than that of oats. More than 2 times.
