

Comfrey Leaf Powder

Cat. No. PAE-013

Lot. No. (See product label)

Product Name

Comfrey Leaf Powder

Package

25 kg/drum

Product overview

Comfrey Leaf Powder is produced by a freeze-drying process or a pray-drying method of pure comfrey leaves, which was once a common medicinal herb, with alternate names like boneset and knits one indicating its former use. Powdered comfrey leaf, however, may be used to make poultices, ointments, salves, and creams for minor skin irritations where there is no broken skin.

Description

Comfrey contains poisonous chemicals called pyrrolizidine alkaloids (PAs), the leaf, root, and root-like stem (rhizome) are used to make medicine. The amount of PAs found in comfrey changes according to the time of harvesting and the age of the plant.

Comfrey is used as a tea for upset stomach, ulcers, heavy menstrual periods, diarrhea, bloody urine, persistent cough, painful breathing (pleuritis), bronchitis, cancer, and chest pain (angina). It is also used as a gargle for gum disease and sore throat.

Comfrey is applied to the skin for ulcers, wounds, joint inflammation, bruises, rheumatoid arthritis, swollen veins (phlebitis), gout, and fractures.

Specification

10:1, 30% Shikonin

Appearance

Bronw Yellow Fine Powder

Active ingredient

Shikonin

Application

Pharmaceutical field, health care product field, cosmetic field, food & beverages field, and animal feeds

Features

No Additives, No Preservatives, No GMOs, No Artificial Colors

Shelf life

2 years

Storage

Keep in a cool, dry, and clean place, Protect from moisture and direct light.

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
