

Activated Bamboo Charcoal Powder

Cat. No. PAE-016

Lot. No. (See product label)

Product Name

Activated Bamboo Charcoal Powder

Package

25 kg/drum

Product overview

Activated Bamboo Charcoal Powder is made from the timber of Moso bamboo (lat. - Phyllostachys Edulis) – species of giant timber bamboo native to China and Taiwan. Bamboo is one of the fastest-growing plants on earth. As part of the grass family, it simply regrows itself from the existing root structure when cut. This makes bamboo a very sustainable and environmentally friendly resource.

Description

Moso bamboo is grown for about 5 years without pollution. After harvesting, it is carbonized at a temperature above 1000°C, then undergoes activation, ultrafine grinding, and sieving until the final bamboo charcoal powder with excellent absorption powers is obtained.

For centuries the detoxifying powers of bamboo charcoal were highly praised in Asia. Added to cosmetics, the powder makes an ideal purifier, absorbing impurities and providing a gentle detox, thus leading to healthier-looking, suppler and smoother skin.

Specification

100% pass 80 100Mesh, Ultrafine(D90)

Application

Cosmetics of Skincare Products, Water Purifier, Medicine, Natural deodorizer, Dehumidifier, Food disinfectant

Features

No Additives, No Preservatives, No GMOs, No Artificial Colors

Shelf life

2 years

Storage

Keep in a cool, dry, and clean place, Protect from moisture and direct light.

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
