Cat. No. PAE-020

Lot. No. (See product label)

---

## Product Name

Almond Milk Powder

## Package

25 kg/drum

## Product overview

Almond Milk Powder is refined by almond milk extracted out of the clean and fresh almonds with advanced vacuum concentration technology. It is made with almond seeds and fresh milk and is a healthy beverage made with ground almonds, which do not contain any cholesterol or lactose. It can be used to elaborate any kind of product, especially ice creams or dairy products.

## Description

It is ideal for the production of beverages and can be reconstituted by dilution with water in order to reach the Brix grades of ready-to-drink products. In order to maintain its properties, a 4 to 10 degrees Celsius temperature in storage is recommended.

Almond milk powder contains rich trace elements such as eighteen amino acids and contains dietary fiber, protein, vitamin E, unsaturated fatty acid, and the essential minerals calcium, copper, iron, magnesium, manganese, phosphorus, and zinc.

Almond milk powder has many potential health benefits. It may help control your blood fat, scavenge free radicals, delay aging, and improve digestion, it may also help lower LDL cholesterol and blood pressure.
