

Abalone Collagen Peptide

Cat. No. PAE-059

Lot. No. (See product label)

Product Name

Abalone Collagen Peptide

Package

25 kg/drum

Product overview

Abalone Collagen Peptide is a type of collagen peptide derived from abalone, a type of sea snail that is highly valued for its culinary and medicinal uses. Collagen peptides are short chains of amino acids that are derived from collagen, the main protein found in the skin, bones, and connective tissues of animals, including humans.

Description

This peptide is rich in amino acids, particularly glycine, proline, and hydroxyproline, which are essential for maintaining the health and structure of our skin, hair, nails, and joints. It is believed to have various benefits, including promoting skin elasticity, reducing the appearance of wrinkles, strengthening hair and nails, and supporting joint health.

The collagen peptide is typically hydrolyzed, meaning it has been broken down into smaller peptides, making it easier for the body to absorb and utilize. It is commonly used as an ingredient in beauty and skincare products, as well as dietary supplements targeting skin and joint health.

Part used

Natural Abalone Body

Appearance

Grey Brown Powder

Active ingredient

Abalone, abalone polypeptide, abalone polysaccharide, protein, vitamin, and amino acids

Test method

Freeze-drying, spray drying

Application

Nutraceutical and Supplement Industry, Cosmetics and Skincare Industry, Sports Nutrition Industry, Food and Beverage Industry, Animal Nutrition Industry

Shelf life

2 years

Storage

Keep in a cool, dry, and clean place, Protect from moisture and direct light.

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
