

Sea Cucumber Peptide

Cat. No. PAE-067

Lot. No. (See product label)

Product Name

Sea Cucumber Peptide

Package

25 kg/drum

Product overview

The sea cucumber peptide is a marine bioactive peptide produced from the precious sea cucumber intestine eggs, which has a wide range of applicable populations and a good nourishing effect. Sea cucumber peptides are high-protein, multi-nutrient, low-cholesterol, and low-fat, easily-absorbable active peptide foods, which have both nutritional supplementation and functional regulation.

Description

Sea Cucumber Peptide Powder is made from pure natural iced sea cucumbers from the Arctic sea area, refined through modern biological enzymatic technology, freeze-drying, and other processes, and the active substances of sea cucumbers are retained to the greatest extent during the extraction process. The product is a protein hydrolyzed substance with small molecular active peptides as the main component and multiple functions coexist. It has a series of functions such as anti-fatigue, immune regulation, and blood pressure reduction. In vitro, skin care experiments show that sea cucumber peptide powder also has moisturizing properties and inhibits melanin formation. and other activities.

Specification

75% oligopeptides

Application

Nutritional food for rehabilitation after illness;Athlete food, Health food for special population

Features

Good solubility, Good stability, Low viscosity;Easy to digest and absorb, No antigenicity, safe to eat

Shelf life

2 years

Storage

Keep in a cool, dry, and clean place, Protect from moisture and direct light.

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
