

Chicken Leg Mushroom Extract

Cat. No. PAE-127

Lot. No. (See product label)

Product Name

Chicken Leg Mushroom Extract

Product overview

Coprinus comatus is a common fungus often seen growing on lawns, along gravel roads and waste areas. The young fruit bodies first appear as white cylinders emerging from the ground, then the bell-shaped caps open out. The caps are white, and covered with scales—this is the origin of the common names of the fungus. The gills beneath the cap are white, then pink, then turn black and secrete a black liquid filled with spores (hence the "ink cap" name). This mushroom is unusual because it will turn black and dissolve itself in a matter of hours after being picked or depositing spores.

Part used

Fruiting body

Specification

Polysaccharide 10% UV

Polysaccharide 20% UV

Polysaccharide 30% UV

Polysaccharide 40% UV

polysaccharide 50% UV

Application

1. Applied in food field.
2. Applied in health product field.
3. Applied in pharmaceutical field.

Features

1. It has the effect on relieving stresses and protecting the body against various stresses, including physical, mental, or emotional stress;
2. It has the function of enhancing immunity, protecting the body from diseases such as cancer and diabetes;
3. It contains antioxidants, which protect cells against damage caused by free radicals;
4. It is used to protect and support the immune system, antibacterial, and anti-inflammatory, for preventing colds and upper respiratory infections;
5. It has the effect on lowering blood pressure, treating diabetes and protecting the liver.
